Index to volume 28 (1990)

No 1 (January) pp 1–64

No 2 (March) pp 65–128

No 3 (May) pp 129–192

No 4 (July) pp 193–288

No 5 (September) pp 289–340

No 6 (November) pp 341–436

January 1990

Digital signal processing applied to ultrasonic absorption measurements
R.E. Challis, A.K. Holmes, J.A. Harrison and R.P. Cocker 5

Thermal effects in the attenuation of ultrasound in dilute suspensions for low values of acoustic radius
L.W. Anson and R.C. Chivers..... 16

Equivalent temperature of sonoluminescence at incipient and desinent thresholds of light emission
P. Ciuti, G. Iernetti and G.K. Johri .. 27

Comparison of the reactions induced by ultrasound and gamma rays in aqueous lactose solutions
H. Heusinger 30

Ultrasonic velocity of aqueous solutions of amino acids
Wang Jin and Feng Ruo..... 37

In vivo biomicroscopy with ultrasound 2
K. Santosh, W. Tobocman, E.M. Haacke and F. Boada..... 40

Research notes

Non-destructive testing transducer for high temperature applications
M.A. García-Olias and F.R. Montero de Espinosa 50

Development of a double-element pulse echo, PVDF transducer
C.C. Habeger and W.A. Wink..... 52

Uni-dimensional modelling of piezoelectric cylindrical bar elements using modified material parameters
G. Hayward, S. Trench and D. Gillies 54

Wave-front conjugation by stimulated Brillouin scattering near the critical point
I.N. Kozhevnikova and L. Bjørnø 56

Threshold of stimulated acoustic scattering and relation to noise
I.N. Kozhevnikova 57

March 1990

Transverse whispering gallery waves in scattering by elastic cylinders
N.D. Veksler..... 67

Depth measurement for corner cracks of arbitrary angle using Rayleigh waves
P.A. Doyle and C.M. Scala..... 77

Non-linear effects of acoustic generation in solids
O.V. Abramov, O.M. Gradov and M.I. Yudin..... 83

Analysis of a non-linear frequency diverse clutter suppression algorithm
N.M. Bilgutay, U. Bencharit, R. Murthy and J. Saniie 90

Recent developments in quantitative ultrasonic NDE of composites
W. Sachse, B. Castagnede, I. Grabec, K.Y. Kim and R.L. Weaver..... 97

Experimental selection of a transmitting source for a three-dimensional tomograph devoted to time of flight measurements
G. Gimenez, F. Denis and O. Basset 105

Measurements of frequency spectra of transmission coefficients to ultrasound through trapped microbubbles
J. Wu and W.L. Nyborg 115

Research notes

Excess isentropic compressibilities of *N,N*-dimethylformamide and *N,N*-dimethylacetamide with aliphatic esters at 303.15 K
K. Purnachandra Rao..... 120

Real-time digital dynamic focusing system
G. Castellini, L. Masotti, A. Matucci, S. Modi and S. Rocchi..... 124

May 1990

Gel-sectioning technique to evaluate phonophoresis *in vitro*
A.R. Williams, E.H. Rosenfeld and K.A. Williams..... 132

Phonophoresis: an *in vivo* evaluation using three topical anaesthetic preparations
A.R. Williams..... 137

Possible explanation for the unexpected absence of gross biological damage to membranes of cells insonated in suspension and in surface culture in chambers exposed to standing and progressive wave fields
D.J. Watmough, K.M. Quan and M.B. Shiran 142

Ultrasound effects on miniature end plate potential discharge frequency are contingent upon acoustic environment
W.J. Revell and M.G. Roberts 149

Positive and negative effects of diagnostic intensities of ultrasound on erythrocyte blood group markers
E. Rosenfeld, U. Romanowski and A.R. Williams..... 155

Identification of mechanisms responsible for fetal weight reduction in mice following ultrasound exposure
S.B. Barnett and A.R. Williams 159

Novel approach to evaluate the interaction of pulsed ultrasound with embryonic development
S.B. Barnett, D.A. Walsh and J.A. Angles 166

Effects of ultrasound on placental transfer during the last third of gestation in the rat
D.E. Atkinson, C.P. Sibley and A.R. Williams..... 171

Effect of therapeutic ultrasound on the healing of full-thickness excised skin lesions
S.R. Young and M. Dyson 175

A search for sonoluminescence *in vivo* in the human cheek
T.G. Leighton, M.J.W. Pickworth, J. Tudor and P.P. Dendy 181

An alternative explanation for a postulated non-thermal, non-cavitational ultrasound mechanism of action on *in vitro* cells at hyperthermic temperature
M. Inoue, M.W. Miller and C.C. Church 185

July 1990

Acousto-optics and its perspectives in research and applications
A. Śliwiński..... 195

Rayleigh wave scattering from surface features: wedges and down-steps
R.J. Blake and L.J. Bond..... 214

Split-spectrum processing with finite impulse response filters of constant frequency-to-bandwidth ratio
J.-D. Aussel..... 229

Three-dimensional imaging system based on Fourier transform synthetic aperture focusing technique
K. Mayer, R. Marklein, K.J. Langenberg and T. Kreutter 241

ECOLOG II: a real-time acoustic signal processing system for fish stock assessment
A. Stepnowski and R.S. Mitchell .. 256

Ultrasonic characterization of a food emulsion
D.J. McClements, M.J.W. Povey, M. Jury and E. Betsanis..... 266

September 1990

On the origin of sonoluminescence and sonochemistry
K.S. Suslick, S.J. Doktycz and E.B. Flint 280

Industrial applications of high power ultrasound for chemical reactions
R.L. Hunicke 291

Sonochemistry of volatile and non-volatile solutes in aqueous solutions: e.p.r. and spin trapping studies
P. Riesz, T. Kondo and C.M. Krishna 295

Ultrasonic initiation of polymerization
P. Kruus, M. O'Neill and D. Robertson 304

Sonochemical Na/K alloy emulsion synthesis of polysilynes
T.W. Weidman, P.A. Bianconi and E.W. Kwock..... 310

Ultrasonic waves as promoters of radical processes in chemistry: the case of organometallic reactions
J.L. Luche, C. Einhorn, J. Einhorn, J.C. de Souza Barboza, C. Petrier, C. Dupuy, P. Delair, C. Allavena and T. Tuschl 316

Ultrasound-promoted stereocontrolled synthesis of fluorinated molecules
T. Kitazume..... 322

Index to volume 28 (1990)

No 1 (January) pp 1–64

No 2 (March) pp 65–128

Reactivity and selectivity in organic sonochemical reactions involving inorganic solids
T. Ando and T. Kimura 326
Sonoelectrochemistry
T.J. Mason, J.P. Lorimer and D.J. Walton 333

November 1990

TEA-CO_2 laser generation of ultrasound in non-metals
G.S. Taylor, D.A. Hutchins, C. Edwards and S.B. Palmer 343
Ultrasonic vehicle guidance transducer
W.S.H. Munro, S. Pomeroy, M. Rafiq, H.R. Williams, M.D. Wybrow and C. Wykes 350
Wide-band SAW dispersive filter with a flat amplitude response
J. Filipiak, A. Kawalec and E. Danicki 355
Lamé mode evidence and its theoretical reconstruction
P. Diodati, E. Menichella-Saetta and M. Severcan 358
Five port lattice model for simulation of piezoelectric structures possessing twin, compressional modes of vibration
G. Hayward and D. Gillies 363
Relationship between elastic anisotropy and texture in metal–matrix composites
M. Spies and K. Salama 370
Theoretical assessment of the errors involved in ultrasonic location and sizing of molten weld pools
J.A. Ogilvy and J.A.G. Temple 375
Effect of moisture content on ultrasonic velocity and attenuation in woods
H. Sakai, A. Minamisawa and K. Takagi 382
Studies on ultrasonic properties of different series of liquid systems
M. Alagar, M. Ponnusamy and V. Krishnasamy 386
Ultrasonic velocity hydration numbers of polyamines
A. Juszkiewicz and M. Figlerowicz 394
Attenuation of ultrasound in milks and creams
C.A. Miles, S. Shore and K.R. Langley 394
Non-contact acoustic method for the simultaneous measurement of thickness and acoustic properties of biological tissues
H. Okawai, M. Tanaka and F. Dunn 401
Some of the factors involved in the Sarvazyan method for recording ultrasound field distributions with special reference to the application of ultrasound in physiotherapy
M.B. Shiran, K.M. Quan, D.J. Watmough, K. Abdellatif, J.R. Mallard, D. Marshall and D.W. Gregory 411
Microbial content of aerosols produced from suspensions exposed to megahertz frequency ultrasound
M.A. Grundy, W.T. Coakley and D.J. Clarke 415
Ultrasonically enhanced chemical dissociation from solid surfaces with application to cleaning electronic circuit boards
D.H. McQueen 422

sonochemistry, e.p.r. and spin trapping 295
Radar signals
amplitude-frequency characteristics, dispersive filter 355
Radicals
sonochemistry, organometallics.... 316
Radioactive materials
gel sectioning, phonophoresis 132
Radiolysis
sonolysis, lactose solutions 30
Rat embryos
bioeffects, tissue effects..... 166
Rayleigh waves
crack depth, scattering 77
wedges, down-steps 214
Real-time phased arrays
digital focusing techniques, ultrasonic imaging 124
Salad cream
food emulsions, materials characterization 266
Sarvazyan method
physiotherapy, dye paper method . 411
Scattering
Rayleigh waves, crack depth 77
Skin lesions
therapeutic ultrasound, healing 175
Solids
non-linear effects, acoustic generation 83
Sonar arrays
uni-dimensional modelling, piezoelectric bar elements..... 54
Sonochemistry
acoustic cavitation, sonoluminescence 280
electron microscopy, organic synthesis 326
fluorine chemistry, chiral compounds 322
organometallics, radicals..... 316
polysilynes, alloy emulsion synthesis 310
ultrasonic cleaning, magnetostrictive transducers 291
e.p.r. and spin trapping, pyrolysis radicals 295
Sonoluminescence
acoustic cavitation, pulses..... 27
acoustic cavitation, sonochemistry 280
cavitation, human cheek 181
Sonolysis
radiolysis, lactose solutions..... 30
Sound velocity
excess isentropic compressibility, molecular interactions..... 120
Split-spectrum processing
clutter reduction, non-destructive testing 229
Stimulated Brillouin scattering
wave-front congugation, critical point 56
Stimulated acoustic scattering
pulse amplification, non-linear acoustics 57
Styrene
polymerization, cavitation..... 304
Suspensions
attenuation, thermal effects..... 16
Synthetic aperture focusing technique
imaging systems, Fourier transforms 241
TEA-CO_2 lasers
polymers, non-metals 343
Tetraalkoxysilanes
ultrasonic velocities, internal pressures 386
Texture
metal–matrix composites, elastic anisotropy..... 370
Therapeutic ultrasound
skin lesions, healing 175
Thermal effects
attenuation, suspensions..... 16
Thickness measurement
biological tissues, acoustic properties 401
Three-dimensional acoustic tomograph
time of flight measurements, focused sources..... 105
Time of flight measurements
three-dimensional acoustic tomograph, focused sources..... 105
Tissue effects
bioeffects, foetal malformations.... 159
bioeffects, rat embryos 166
Titrations
ultrasonic velocities, amino acids.... 37
Transducers
cavitation, microbubbles..... 115
Transducer modelling
ultrasonic arrays, linear systems.... 363
Transverse waves
whispering gallery waves, elastic cylinders 67
Ultrasonic absorption
digital signal processing, acoustic absorption spectrometry 5
Ultrasonic arrays
transducer modelling, linear systems 363
Ultrasonic cleaning
electronic circuit boards, electrochemistry 422
sonochemistry, magnetostrictive transducers..... 291
Ultrasonic fountains
aerosols, micro-organisms 415
Ultrasonic imaging
digital focusing technique, real-time phased arrays..... 124
Ultrasonic transit times
welds, error assessment..... 375
Ultrasonic velocities
amino acids, titration..... 37
hydration, polyamines 391
tetraalkoxysilanes, internal pressures 386
Ultrasound mechanisms
in vitro cells, hyperthermia..... 185
Uni-dimensional modelling
piezoelectric bar elements, sonar arrays 54
Vehicle guidance
linear ultrasonic arrays, air sonar... 350
Visualization of ultrasonic field
guided waves, acousto-optics..... 358
Wave-front congugation
stimulated Brillouin scattering, critical point..... 56
Wedges
Rayleigh waves, down-steps..... 214
Welds
ultrasonic transit times, error assessment 375
Whispering gallery waves
transverse waves, elastic cylinders... 67
Wood
fibre saturation point, moisture content 382
